Zeitschrift für Arbeitswissenschaft
(German Journal of Ergonomics)

Editor-in-Chief:

• Prof. Dr. K. Landau

Editorial Board:

- Prof. Dr. H. Bubb
- Prof. Dr. R. Reichwald
- Dr.-Ing. W. Schultetus
- Prof. Dr. H. Strasser

- **The Gesellschaft für Arbeitswissenschaft**
not a country based but rather a language based society
(31.12.2007: 539 members from Germany, Austria, and Switzerland).
- **Two conferences per year:**
 - **Spring Conference** principally a more scientifically-oriented event in order to provide a forum for young ergonomists and work scientists.
 - **Fall conference** more practitioner oriented.
- **Work scientists and ergonomists**, as well as **occupational physicians** from research institutes and universities **meet yearly to exchange experiences and ideas on current issues and problems of ergonomics**.
- **Personnel** responsible for **occupational health and safety** of the workforce, staff in charge of **work planning** in companies, and **members of professional associations, trade unions, mutual insurance associations**, and government agencies are mostly **interested in knowledge of work design** that is applicable to real-life situations.
- **Ergonomics**, as an applied and interdisciplinary science, with its goal of **comprehensive work design**, is expected to **develop and provide methods and procedures** as well as examples for the **analysis, assessment**, and the **ergonomic design of workplaces, work tools, work courses and contents**, and **working environment**.
- This is also true for **product-ergonomics**, i.e., user-friendly, developments and research activities.
